@Ovoko

Photography and Software Engineering

I thought it's different... but appears it's not.

Sergej Kurakin

42+ years old.

20+ in programming.

20+ with PHP.

<few other>, dip.:studija, NFQ, Oberlo /
Shopify, Ovoko

3+ as occasional beginner photographer.

Occasionally talk at VilniusPHP.

December 3, 2015: “Kodėl aš skaitau
pranešimus”

December, 2019: “Understanding exposure”

February, 2020: “My first* camera”

And so, 3+ years and 52 700+ useless(?) photos
later

I started to think that Photography and Software Engineering has something in common.

Simple Similar Terms:

Composition

Patterns

But there is more!

Problem-solving

Iterative process

Attention to detail

Creativity

Technical skills

Continuous Learning

Collaboration

Coding / Photography Challenges

Code Kata / Composition Exercises

Hard Job vs Inspiration

Instant Gratification

Some people won't understand the struggle

My learnings:

Hard Job and Discipline.

Always try new things.

Keep learning.

Don't overthink!

Fully immersive process.

Thank you!

Thank you!
